Lancaster Farming

VOL. 7 NO. 33 Lancaster Farming, Saturday, July 14, 1962 $2 Per Year

HOMEMADE RAIN was about the only kind of rain to be found in the garden spot this week. A few sprinkles on Thursday were not even enough to whet the farmer's appetite. Pastures were burned brown and furnishing practically no feed in most sections. Irrigation pumps kept pastures growing on some farms such as this one at Willow Street R1. Raymond L. Witmer has watered his alfalfa hay crop and one field of corn in addition to rotating the sprinklers as he rotates the cows on pastures. He follows the cows with the irrigation giving the grass a needed spurt just after it has been cropped close by the herd of Guernseys. By this method he has kept his herd in good grass all summer in spite of the drought. L. F. Photo

Scattered Showers Fail To Break County Drought

Thursday brought the first measurable rain to Lancaster County in over three weeks but did little to break the drought that has gripped the Garden Spot for over a month

Farmers watched the overcast skies Thursday in the hope that the water needed so desperately by growing crops was about to fall but most of the county got only a light sprinkle and some areas got none at all

With a 2.32 inches deficit in May and another .85 shortage of rainfall below normal in June and with no measurable rainfall at all in July, most areas of the county must have rainfall soon or crops will be permanently damaged The U S Weather Bureau held out hope that some rain might be forthcoming at the beginning of the week

Most farmers interviewed Friday felt that yields crops have not yet been seriously affected but will be soon unless rain falls The exception in crops is hay and pasture which are extremely short

Farmers report tobacco growth slowed by dry weather, but [illegible] of the ones interviewed [illegible]ed that the crop wo[illegible]ume normal growth a[illegible] a good crop if

[illegible] on page 7)

USDA OK's [illegible]ray In Seeding Leg[illegible]y

Farmers planning to seed alfalfa in the next few weeks can look forward to help in combatting the weeds this year

To aid the farmers in their fight against weeds scientists have put the B on 2,4-D A new chemical closely related to the old standard 2,4-D is now available and is called 2,4-DB (the B is for butyric acid)

Farmers know what 2,4-D will do to pigweed and dock They also know it will kill such plants as alfalfa, red clover and ladino According to agronomists at the Pennsylvania State University, 2-4-DB can be used on any of these legumes and other pasture crops without injuring them It will however control ma[illegible] prevalent in [illegible]

2,[illegible]ntly been clear[illegible]S. Department [illegible]re on a no-residue basis This means it must be used 30 days prior to grazing or harvesting of a forage crop.

Research indicates it is effective against such common weeds as dock, ragweed, lambs quarter, pigweed and thistle. It is not effective, however, in controlling garlic

Pasture and hay growers will find 2,4-DB useful in establishing alfalfa and pastures It can also be used to control weeds in spring seeding of hay and pasture crops.

2,4-DB gets its effectiveness from the 2,4-D part of the chemical formulation An enzyme contained in certain broadleaf weeds changes the harmless 2,4-DB to the highly active 2,4-D Alfalfa and certain clovers do not have the enzyme mechanism for changing 2,4-DB to 2,4-D and are thus unharmed by the new chemical.

Additional information about this new weed killer may be obtained by contacting the county extension agent.

County 4-H Judging Team Wins Trophy In Southeast District

A three member livestock judging team from the Garden Spot county took the second leg of a three year challenge trophy Wednesday at the Southeast Pennsylvania 4-H judging contest.

The team of Darvin Boyd, Ephrata R1, Donald Trimble Quarryville R1, and Wilbur Hosler, Manheim R3, beat out teams from eight other counties in the district to move within one win of retiring the trophy.

The host county, York, placed second in the contest scheduled as a warm-up event for the state contest next month at the Pennsylvania State University. York previously won the trophy in 1958 and 1961.

Lancaster county took the cup in 1960 when Boyd was high in individual scoring. In Wednesday's event Boyd was again high in judging beef cattle and second in scoring in all six class of beef, sheep and swine

Hosler was sixth in total score and Trimble tied for eighth place with Larry Hart, Quarryville Trimble, who was also tied for third in swine judging won the berth on the team when he outpointed Hart in giving reasons

Other county judges includ-

Garden Spot Baby Beef Club To Hold Show

The 40th annual show and sale of the Garden Spot Baby Beef Club will be held August 14th & 15th at the Lancaster Union Stock Yards

The show and sale will be conducted by the Lancaster Livestock Exchange and the Union Stock Yard Co

The club composed of 47 farm youth, sons and daughters of livestock producers from the Lancaster market area, purchased steers offered at this show on the Lancaster Stock Yards, about the first of the year

The baby beeves will be shown as a group with special emphasis given to beef type rather than to breed Judges will be John Tatura, buyer for Consolidated Dressed Beef Co of Philadelphia Al Schaeffer, buyer for Armour & Co Reading Pa

Roy Garber Will Host Plowing Matches

Roy H Garber, Lititz R3, will host the annual Lancaster County Plowing Contest to be held Monday July 23

County Farm Agent Max M Smith said the 1 p m contest will be open to all county farmers and regularly-employed farm workers 16 years or older

Monday, July 16 has been set as the deadline for entering the matches.

Smith said the level-land plowing event can be entered by contacting contest chairman, Elmer V. Good, Lititz R1 or the office of the county agent. He said the competition, sponsored by the Lancaster Council Soil Conservation District, will be limited to about 15 contestants.

Smith said about half the number entered in the competition will receive cash, trophies or tools as prizes. Rain date will be July 30.

4-H Field Day Plans Completed

Judy and David Denlinger, co-hairman for the county 4-H Field Day have announced that plans for the day are complete

On Thursday, July 19, at 2 p m the program will get under way at Long Park in Lancaster with swimming volley ball and baseball for all 4-H club members

Following the picnic supper

Berkshire Swine Type Conference At Harrisburg

Exhibitors from 14 states will converge on Harrisburg next week for the National Berkshire Type Conference.

Berkshire swine breeders will be showing their best when the national conference opens in the Farm Show Building on July 19, 20 and 21.

The conference, with emphasis on the theme of meatier carcasses, will feature many entries from Certified litters or by Certified Sires Many of the entries, which will be consigned to the sale on Saturday afternoon, will have with them records of feed conversion

One of the most interesting features will be the junior Judging Contest to be held on Saturday morning, July 21 at 8 30 a m Contestants must be registered in by 8 30 a m and are then eligible for the trophies and over $500 in free buying credits The contest is open to any 4-H or FFA boy or girl.

Farm Calendar

July 16—Deadline for plowing contest entries. Apply to the County Agent's office, Post Office building, Lancaster

July 16—1 p m — County 4-H demonstration days at Penn Manor High School

8 p m. — Meeting of the Manheim Farm Show committee in the Manheim Central High School.

July 17—8 p m — Meeting of the Lincoln Community 4-H club in the Mount Airy fire hall.

FIVE-DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures during the next five days are expected to average 2 to 5 degrees below the normal range of 60 at night to 87 in the afternoon. Cooler temperatures are expected on Saturday to give way to a warming trend on Sunday and turn cooler again Monday and Tuesday. Precipitation during the period may total more than ½ inch falling as showers in most areas Monday and Tuesday.

Highest Bid Since March

Broiler prices climbed for the second consecutive week at the Lancaster Poultry Center as 74,400 head in 16 lots at the July 12 auction ranged from 17 0 to 18 3 for a sale average of 17 12.

One lot of 800 broilers offered at the Thursday afternoon sale was bid to 17 2 but was not sold In addition to the broilers, two lots containing 2,350 leghorn fowl brought 10 and 10 8 while 1,200 pullets in two lots sold for 24 cents per pound

The 18 3 bid by Carl B Risser for 1,000 white vantress pullets at eight weeks, 6 days consigned by Miller and Bushong and grown by Harvey Bowman, was the highest broiler price at the Poultry Center since March 31 when one lot was bought at 18 4, but that sale averaged only 16-79.

The complete July 12 sale offered 78 750 head in 21 lots and sold 77 950 head in 20 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis amount and breed, age in weeks and days, buyer and price.

Delmarva-Georgia

Demand Light; Price Declines

Live prices for broilers in Delmarva declined about ½ cent during the 24 hour period ending 10 30 Friday morning

Demand was lighter for the moderate offerings with prices of 15 9 to 17 reported on 862,000 head at farms during the period These included 196,300 head purchased at Thursday's auction at the Eastern Shore Poultry Producers Exchange

Estimated slaughter by eastern shore processors for the week end is 819 700 head compared to 752 000 head last week end

The Delmarva broiler-feed ratio for the week ending July 6 was up one point from the previous week at 3 3 Broilers averaged 15 68 cents per lb and mash cost of the grower $95 34 per ton

● Fluid Milk

Seasonal Drop In Production

Although production of fluid milk remained fairly steady in a few areas, milk production in general continued its seasonal decline

Throughout most of the northeast pastures remained in poor conditions due to lack of rain

Supplies were adequate for bottling needs in the Northeast as bottling demand tended to decline in metropolitan areas, but increased in resort areas

In New York diversions to manufacturing plants were light and based on prior commitments while in New England some separating activities were reduced or restricted due to lack of surplus

Wholesale selling prices for fluid milk in the New York area ranged $4 65-$4 80 per 40 quart unit of bottling quality milk.

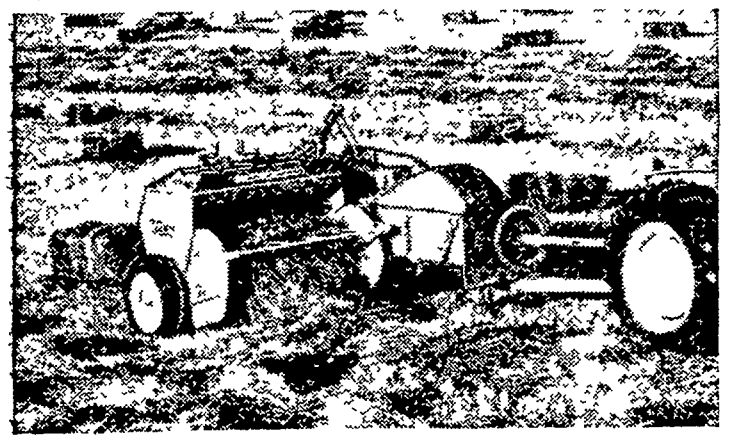
FIRST SHOWING HERE!



New compact baler with a full-sized appetite

Here's Big Capacity and Keep-Going Performance — the All-New PTO, Twine-Tie Model 200 from Allis-Chalmers.

- It's field proven and customer tested . . . you can depend on it.
- Unique special twin-feed rakes keep hay moving for uniform, well-shaped bales.
- Proved knotters tie quickly, firmly . . . require minimum attention.
- Bale length and weight easily adjusted.
- Built for high-speed baling — rugged, high quality construction.
- Bales stay tied during handling — they are *grooved* to hold twine, allow air circulation in the stack.
- Built-in protection for baler and tractor — over-running drive clutch, 2 slip clutches plus shear pins.

See the New Model 200 we now have on display. Bale thrower available as optional equipment.

Finance for profit. Ask us about Allis-Chalmers' time payment plans.

From Where We Stand . . .

Isaiah Said, All Flesh Is Grass

How can you spend a whole day just talking about grass?

This was the question of a colleague in the newspaper field when we returned from a press conference at Hershey recently.

Members of the press from as far away as Des Moines, Iowa and Fort Atkinson, Wisconsin were on hand to hear a briefing on the First National Grassland Field Day and Conference to be held on the Hershey Estate next month.

It might have been hard for a newspaper writer to understand that there could be enough material about grass to fill a day, but we are sure it will come as no surprise to farmers that three days during the middle of August have been set aside to discuss, demonstrate and observe grassland practices materials, and procedures

Scheduled to be held on the site of the 1958 National Plowing Matches, the Grassland Field Day promises to be the biggest agricultural event in the state, perhaps the eastern United States, this year

Almost 300 acres of farmland have been reserved for demonstration and exhibit purposes Some 57 machinery manufacturers have already purchased 25 acres of space in which to display their wares, and a dozen more are expected to purchase space before the date of the event This exhibit space is in addition to the area under the huge sports arena grandstands which has also been totally allocated for exhibits

Farmers and professional agriculturalists interested in any phase of grassland management from soil tillage through seeding and harvesting to utilization of the forage should find demonstrations of interest

John Baylor, co-manager of the event said interest in the North American hay show, to be held in conjunction with the event, has been keen, with many inquiries coming from Canada and one sample of Alfalfa from California already in the hands of the committee

Bus and airplane tours of Hershey as well as Lebanon and Lancaster Counties, field demonstrations from seedbed to cow, machinery exhibits educational exhibits from more than a dozen Land-Grant Universities, materials handling exhibits, and a speaking program each of the three days, in addition to the North American Hay Show and the Pennsylvania Plowing contest should provide a program of interest for every member of the farm family

The latest in mechanical and chemical grassland farming equipment and materials and the latest varieties of forage in growing conditions will be balanced out with a demonstration each day of an old time threshing demonstration

And to round out the activities, there will be an Ox roast and a booth where the "inner man" (according to John Baylor) can be satisfied with a milkshake at a price

It is difficult to convey the magnitude of the event in the space we have here, but we urge all countians to take time out on August 15, 16 or 17 to visit the Field Days.

Farmers should come away understanding better the Old Testament philosophy that "All flesh is Grass"

At least that's how it looks from where we stand.

★ ★ ★ ★

Rain On the Unjust

It seems that almost everywhere these days, the most common topic of conversation is the weather In most parts of our county it is lack of rain that is demanding the most attention

When we mentioned to an acquaintance that some rain fell in another section of the state during the past week end, he said, "they must be living right down there"

Perhaps, during weather such as we have been having this summer, an arrangement where right living would bring rain might be quite an inducement to farmers to live right.

But we have been told that the rain falls on the just and the unjust alike

That being the case the only thing that remains for us to do is to do the best we can all the time and trust that the Lord will send rain whenever we should have it

At least that's how it looks from where we stand

Don't Throw Away The Key

Sound conservation of natural resources doesn't consist of locking the door and throwing away the key

That, in essence, is the position taken by Chairman Aspinall of the House Committee on Interior and Insular Affairs Speaking to the White House Conference on Conservation, he said "It is my hope and prophecy that Congress will continue to act with moderation in the field of conservation We are not going to engage now, any more than we did 50 or 100 years ago, in either wholesale giveaways or wholesale isolation of our resources We are not going to create mausoleum-like museums in which people can go see resources that cannot be utilized or, even worse, see the surface and be compelled to wonder as to what resources might be uncovered if only we were allowed to look"

If some people, whose good intentions far outweigh their qualities of judgement, had their way this burgeoning nation would be denied the utilization of vital resources — minerals, oil, timber, water, land — which we will sorely need as time moves on

The goal is to make careful use of our resources, while preserving wildlife and scenic and recreational assets That can be done, with complete success, under wise and moderate laws and regulations

Give Cows Shelter

Cows need shade in hot weather If trees are not available, Joe Taylor, Penn State Extension dairy specialist, says a cheap shelter will serve the purpose and pay dividends Where zero grazing is practiced cows will consume more chopped grass if feed bunks or self-feeding wagons are located in the shade.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Materials Habakkuk; 2 Kings 23 29 37
Devotional Reading. Psalm 77 5-15

O, God—Why?

Lesson for July 15, 1962

DOES it seem to you that this world doesn't make sense? Move over; you've got company. The bench that will seat all the people who find this world a maddening puzzle, will have to be a long one. And you will find distinguished company there Here comes a man in the robes of a faraway land Yet you can tell from the look in his eye that he is one of the world's truly distinguished men For he has about him the look of a genuine prophet, a man of God Habakkuk does not come to the inquirer's bench at first like a man with all the answers. He brings questions, not answers The few pages that remain to us of his prophecies are unique, for other prophets come to us with their minds made up; Habakkuk (so to speak) makes up his mind in public The answer he seeks comes to him, not from him.

Dr. Foreman

A Time of Violence

Habakkuk breaks out with a cry of "how long?" and "why?" He lived in the time when the nation of Judah was in the grip of what today we call a crime wave . only that was more like a tide It was a time of violence, of brutality and lawlessness, of perverted "justice" What Habakkuk cannot understand is why God does not at once put a stop to it He was not the first nor the last man to be so discouraged about the state of the world that he gives up hope of human help and believes that only some sudden act of God can sweep the many evils aside and usher in peace and justice But God stays his hand It seems clear to Habakkuk that God will not intervene,—and this only adds to his desperation God does not always do what we want him to do, and, particularly God does not always do what we want him to do when we want him to do it We are like children—impatient if God does not operate on our schedule But God has his own plans and times He never comes too late

Scourge of God

Now the Lord gives Habakkuk an answer, an amazing answer. "I am rousing the Chaldeans," God tells the prophet That would be as shocking in Habakkuk's ears as if some one were to tell us that God is rousing the Russians. Chapter 1:5-11 gives a grim picture of the Chaldeans. Any Israelites would have agreed 100% with it. This was a cruel, strong, ruthless, plundering, tyrannical, atheist nation. They are well armed, "they come for violence; terror of them goes before them." God does not paint them in pretty colors. What would seem strange and incredible to Habakkuk is not the darkly violent description of the Chaldeans, the nation all other nations feared and hated; what Habakkuk would find all but impossible to believe was that God would stir them up

Yet that was the fact Those cruel people were "the scourge of God," to punish the people of God for their own sins The prophet's question, we remember, was, Why doesn't God do something about the sinfulness of this nation? God's answer is I am even now preparing a terrible scourge with which to lash this people for their crimes. And the name of the scourge is—Chaldea!

A Lesson for Faith

This answer still does not satisfy the unhappy prophet How is it that a just and good God, to say nothing of his wisdom,—how is it he will use such a wicked nation as the Chaldeans to punish his own people' Space fails to tell all that Habakkuk learned in this time of crisis about the ways of God One thing was that God is in control He sets bounds to evil. Neither on this earth nor anywhere in his creation does God offer his throne to Satan Nowhere does God relinquish control.

Another thing the prophet learns is that we have to look beneath the surface of things to see the truth All things must be judged, not by what can be seen in a moment's glance, but by the long run Habakkuk learns that God does not pay all his accounts in October, but God does pay. "The arrogant man shall not abide," as Hitler's ghost could tell you. He who would understand the ways of God must be a patient man of faith, for the man of faith, in contact with the mighty God, shall forever live.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Enroll In Five-Acre Corn Contest

Corn producers are reminded of the August 1st deadline to enroll in the Pennsylvania Contest entry blanks are available at the Extension Office

To Prepare For August Seedings

Mid-August seedings of alfalfa and late August seedings of red clover should make good forage production for the 1963 season Growers are urged to prepare the ground several weeks in advance of seeding in order to get a firm, weed-free seedbed lime and fertilizer applications according to a complete soil test should be worked into the ground before seeding, the band seeding method is strongly recommended.

To Control Canada Thistles

Many property owners are guilty of not controlling this noxious weed State law requires the control of this weed and local land owners are urged to mow the thistles at once and spray the new growth in order to kill the roots. More attention to the eradication of this weed is badly needed

To Feed Hay and Silage To Suppdement Pasture

Dry weather in many areas has stopped the growth of pasture crops, herd and flock owners should turn to stored feeding in order to maintain condition and production Animals that are allowed to get thin during the summer and early fall are usually costly producers during the following winter. Hay and silage will take the place of pasture and perhaps some temporary pasture crops may be seeded for late fall grazing.

Guernsey 4-H Holds Meeting

The County Guernsey 4-H club will be host at the joint summer meeting of the county 4-H dairy clubs on August 8. A contingent of 4-H club members from Oklahoma will be guests, as will members of the county Holstein and Ayrshire-Jersey-Brown Swiss clubs.

At the July 11 meeting at the farm of Robert McSparran, Peach Bottom, Mary Ellen and Susanne Mumma, Manheim R1 put on a fitting and showing demonstration.

After the demonstration, club members took a picnic supper to the meadow where they had their business meeting.

Ayrshire-Jersey Brown Swiss 4-H To Host Clubs

The Lancaster County Ayrshire, Jersey, Brown Swiss 4-H club will act as host club at the annual county dairy club meeting and banquet, it was announced at the July 9 meeting at the home of J. Everett Kreider, Quarryville R1.

Edwin Harnish, Christiana R1; Marilyn Harnish, Quarryville R2, and Barbara Kupp, Manheim R3, were appointed to serve as the refreshment committee for the banquet to be held October 19 in the Strasburg fire hall.

James Esbenshade, Quarryville R2, was appointed to serve as night watchman at the club's food stand at the Southeastern Pennsylvania Artificial Breeding Cooperative show early next month.

Farm Women Plan Program For Convention

The Society of Farm Women No. 1 met at the home of Mrs. Ira Shearer, Lititz R D. 4, with Mrs. Abram Bollinger as cohostess. Mrs. W Dean Fyock, the president, was in charge and Mrs. C. V. Smith read the devotions.

Contributions were made to Heart Haven, Cancer Society, and Crippled Children. The president announced that County Convention will be held on November 3rd at the Pequea Valley High School. Society No. 1 is responsible for the program.

The next meeting will be held at the home of Mrs. Fyock on August 4th with Jack Tracy, prison warden, as the speaker.

Providence 4-H Hears Lecture

Professor John Rorabaugh of Millersville State College, lectured on Entomology at the recent meeting of the New Providence 4-H Community club.

Professor Rorabaugh showed slides of insects and instructed the members on construction of killing jars, making nets, and how to pin a captured insect.

Susan Atkins, New Providence R1, was elected to represent the club in the county Posture Queen Contest at the 4-H Field Day in Long Park on July 16.

MH-30 halts tobacco suckers —increases yield up to 20%

Sprayed correctly at full-flower stage, MH®-30 prevents sucker growth to produce higher quality tobacco. And because remarkable MH-30 retards sucker growth chemically, it cuts the cost and labor of hand suckering tobacco.

More and more growers are producing higher yields of quality tobacco, some as high as 20%, as they eliminate back breaking hand labor with MH-30 and increase profits. Isn't it time you tried it? For full information, see your local supplier or write: Dept. 7163 - MHT, Elm Street, Naugatuck, Connecticut.

Ph. Lanc. EX 7-3539

E'Town FFA Members Take 4 Week Trek

Four Future Farmers from the Elizabethtown along with a chaperone from the school, began a four week experience Monday which will take them all the way to the west coast

The trip is in the way of a reward for work on a group FFA project begun under the direction of the former teacher of vocational agriculture, Marlin G Henneinger, when the chapter decided to raise 4 5 acres of tobacco on the farm of Richard Breckbill, Elizabethtown R3

Money realized from the sale of the tobacco crop will be used to defray the cost of the trip through Chicago, the badlands of Suth Dakota, the Worlds Fair at Seattle, the major national parks, and side trips into Canada and Mexico

The boys, Irwin Engle Marietta R1, John Frey, Elizabethtown R1, Jay M Gish, Rheems, and Kenneth Myer, Elizabethtown R3, are being accompanied by Mr William Wertz a teacher of industrial art at the high school Present teacher of Vocational Agriculture, who is employed by the school on a 12 month basis, is Elvin Hess

The trip is being planned as an annual event of the Elizabethtown chapter with graduated members who have worked a prescribed number of hours on the project eligible to go

Under class members at the school are hard at work on their crop to finance next year's trip Willis M Hackman, Elizabethtown R3, is in charge of raising 3 5 acres of corn on the Breckbill farm while Gary Kreiner, Elizabethtown R3 and Edward Shoop, Bainbridge, are in charge of growing 2 5 acres of tobacco on the farm of the Coble sisters

The boys plan to camp out during the entire trip and will do their own cooking The local office of the American Automobile Assn Club helped plan a route that would include as much Western agriculture and scenery as possible

● Judging Team

(Continued from Page 1)

ed Kenneth Weaver, Quarryville R2, who was 10th in total score and fifth in beef judging, Carl and Larry Weaver, New Holland, and Eugene Hosler Manheim R3.

Judges came from the counties of Adams, Cumberland, Chester, Montgomery, Northumberland, and Dauphin in addition to York and Lancaster

The local team was coached by 4-H club leader Elvin Hess Strasburg R1

● Beef Club

(Continued from Page 1)

mals will take place Tuesday, August 14th from 8:00 a m, -1 00 p m The baby beeves will be on display in the afternoon.

On Wednesday, August 15th, at 6 30 a m the steers will be weighed Judging in the parking area of the Stock Yards will take place at 9 00 a m Auction of steers will be held in the small animal barn on Wednesday at 1 30 P M

2 From County On State Tour

John Henry Hess Jr, Manheim R1, and his teacher of vocational agriculture, Russell Drumm will go on a tour for three days next week as an award for the first place win in the state land judging contest

Hess turned in the top performance in the state during FFA week at the Pennsylvania State University last month. Drumm will conduct the tour and chaperone Hess and the second and third place winners

The tour will include stops at the Eastern States, Butler Seed Plant, the Drake oil well at Titusville, a state fish hatchery, Niagra Falls, Corning Glass works, LaFrance Fire Engine works, and perhaps a research farm, a fruit testing laboratory and a rose farm Dates of the trip are July 18, 19 and 20

Farm Women 6 Plan Social

Society of Farm Women 6 met recently at the home of Mrs Merle Ruhl, Elizabethtown R3 Co-hostess were Mrs Ray Hirson and Mrs. Charles Nissley

Devotions were led by Mrs Ruhl and members responded to roll call with a joke Entertainment included piano solos by Miss Jean Ruhl and an illustrated travel talk by Mrs Walter Landis

The Society has plans to hold a covered dish social for members and their families at 6 30 p m on August 4, at the Milton Grove Sportsmens Club

Tentative arrangements were made for a bus trip in September or October Societies 5 and 6 will entertain guests at the Lancaster County Home on Thursday, July 19 It was announced that the annual Homemakers Camp will be held at camp Swatara from Sunday Aug 26, to Tuesday, Aug 28.

Farm Women 14 Entertain

Approximately 75 persons were in attendance at the mother-daughter luncheon of the Society of Farm Women 14 Wednesday at the Rhoades Spanish Tavern, Quarryville

Mrs Clarence Groff presided at a short business meeting and Mrs Leon Thomas introduced the speaker, Mrs Helen Bushong

Mrs Bushong gave an illustrated talk on her visit to Sierra Leone West Africa Mrs. Amos Ranck was in charge of devotions

Next meeting of the club will be held at the West Lampeter Community Park on August 8 at 6 30 p m in the form of a family picnic

● Rains

(Continued from Page 1)

favorable weather comes soon. Corn, showing some afternoon wiltime in most of the county, is shorter than normal but farmers believe yields of this crop, too might be near normal if rains soak the ground within the next week

Pastures are burned brown and some farmers report less than 'half a crop on second cutting of alfalfa

The extreme southern portion of the county appears to be least hard hit by the drought, and corn crops are making good growth however, even there hay and pastures are short

In Harrisburg State Agriculture Secretary William L. Henning said Thursday that renewed reports of drought damage indicated additional counties would seek classification as emergency disaster areas

Henning said that his Department was working closely with the United States Department of Agriculture's Disaster Committee for Pennsylvania to determine what counties should be added to the 22-county list certified last Tuesday for the disaster classification by Governor David L. Lawrence The request awaits action by U S Secretary of Agriculture Orville L Freeman

Designation of a county as an emergency disaster area will permit farmers to request permission to cut hay or graze cattle on acreage which has been set aside under the Conservation Reserve Wheat Stabilization and Feed Grain Programs. The classification will also satisfy a major condition for special loans from the Farmers Home Administration

For the Farm Wife and Family

Let's Have A Picnic: Part 2

By: Mrs. Richard C. Spence

When cooking outdoors, you can sizzle more than a steak on your charcoal grill A surprising number of foods go with barbecued meat favorites to put more punch into cookouts.

These "go-withs" are packaged most conveniently in foil either to roast on the grill or to open and serve They include vegetables, salads, breads, and desserts to complete and vary menus

Individual portions of any of these may be prepared in advance, with ready-cut 10 x 12 inch sheets of aluminum foil. These sheets, 75 to a box, are interfolded in the box to dispense like facial tissues.

Here are some suggestions for aluminum foil wrappers:

Vegetables

1) Seal potatoes in a foil wrapper twisting excess foil at the ends into convenient turning handles while baking on the grill or in the coals

2) Mold individual casseroles by pressing two foil wrappers between two custard cups Fill with homemade or doctored canned baked beans. Top with a bacon strip. Heat on the grill

3) After brushing corn-on-the-cob with melted butter, and sprinkling with salt, wrap each ear in a damp paper towel, then in a foil wrapper. Roast on the grill or in the coals for 15 to 20 minutes

4) Remove a block of frozen vegetables from the carton and seal in a foil wrapper. Cook on grill directly over the coals for 25 to 30 minutes on each side.

Salads

1) Wrap the individual makings for a tossed green salad in foil.

2) Cole slaw is terrific, prepared with one of the bottled cole slaw dressings.

3) Hot potato salad is wonderful with hot dogs. Line or mold casserole with aluminum foil to save dishwashing.

Breads

Have them hot and plenty of them Garlic, French or Italian breads, hard, soft, or onion rolls, plus tasty corn sticks, can be wrapped in aluminum foil and heated on the grill.

Desserts

1) Cut watermelon, cantaloupe, or honey dew melons in wedges and wrap individual servings in foil.

2) Cake squares are easy to handle when packaged in foil wrappers

3) Wrap individual slices of ice cream in foil for traveling.

4) Cooked fruit travels best in tarts, sealed in foil. These may be heated on the grill and served with ice cream.

In the meat category, a thrifty suggestion will offer a change from hamburgers and hot dogs. Barbecued Spareribs are steamed in super strength aluminum foil on top of the grill When tender they are removed from the foil to brown directly over the coals Brush frequently with barbecue sauce

* * *

ADD CAMPFIRE VEGETABLES TO BARBECUING PLANS

Those frozen vegetables which added fresh color and variety to your winter meals can do the same for your barbecue menus Using simple campfire preparation, you can have tender brussel sprouts with that sizzling sirloin. Or nippy sweet-sour green beans with a juicy spit roasted ham. Buttered peas and carrots are a natural with spicy Hawaiian short ribs. French fries, succotash, cauliflower and even broccoli can also be added to your outdoor menus.

To prepare campfire vegetables place a block of your favorite frozen vegetable in a square of heavy aluminum foil. Season with salt and pepper. If you're adventurous, try a sprinkle of herb—dill, oregano, celery seed or sweet basil.

Top with 3 or 4 pats of butter Bring the edges of the foil up and seal them tightly using a double fold Make sure to leave a little space for expansion of steam during cooking.

Place the package about 6 inches from the coals with the fold side down. Leave it 5 minutes then turn the package over and cook 15 minutes more. If you aren't quite ready to serve, place the vegetables on the back of the grill. Try not to hold them more than 10 minutes.

If you like onions with your grilled steak you can have them too. You'll want large onions, about 3 inches across for barbecuing. Plan to serve a half onion to each guest. Wrap each in heavy foil, using the drug store wrap. Put the wrapped onions at the edge of the coals and cook about 15 to 20 minutes. Turn the onions about four times while their cooking. You can do them on the grill but it will take about twice as long. When you unwrap the onions just slip the inside of the onion out of its skin and then top with butter seasoned with garlic salt.

Onions and tomatoes make another good vegetable combination for grilling. Alternate tomato halves with thick

slices of onion on a skewer or hold them together with toothpicks. Wrap in foil each set of three tomato slices and two thick onion slices, alternated. Grill as for the onions. Turn about four times during the 20 minutes grilling time. You won't need to season this tomato-onion combination until you're ready to serve ot. With the blend of flavors you may not need seasoning.

* * *

CHIVE BUTTER CARROTS

- 2 carrots, quartered lengthwise
- 1 tablespoon butter
- ¼ teaspoon salt
- 1 tablespoon chopped chives

Place carrots in a square of heavy duty aluminum foil. Spread butter over them, sprinkle with salt and add chives. Seal aluminum foil to make a tight package. Place on grill over hot coals and cook 10 minutes. Turn and cook 10 minutes longer. 1 serving.

Variation: Omit chives and sprinkle buttered carrots with 1 tablespoon brown sugar and a dash of cinnamon. Turn every five minutes.

* * *

BUTTER TOASTED ROLLS

1 dozen brown and serve fan tan rolls
Cheddar cheese cubes, about 1" x ⅛"
Butter, softened
Strawberry jam or jelly

Separate fan tan rolls but do not break apart Insert cheese cubes in between sections Spread each roll with butter Glaze outer surface of rolls with a thin layer of strawberry jam or jelly. Thread on skewers and toast over hot coals until cheese melts and rolls are browned.

* * *

Baked beans make an excellent vegetable accompaniment for an outdoor meal. Use the canned baked beans for a really easy casserole, add molasses, catsup, onion and mustard to enhance the flavor Allowing a one-pound can per four servings, one has a guide to the number of cans to open.

OLD FASHIONED BAKED BEANS

- ⅔ cup molasses
- ⅓ cup prepared mustard
- ⅓ cup vinegar
- 2 tablespoons Worcestershire sauce
- ¼ teaspoon cayenne
- 12 cans (1 pound each) baked beans
- 4 medium onions, sliced

Blend together molasses and mustard. Stir in vinegar, Worcestershire sauce, and cayenne Turn baked beans into a bean pot or large casserole. Stir in molasses mixture and onion slices Bake in moderate oven (350 degrees) 1 hour and 15 minutes. Makes 48 servings If you want to make beans for a smaller group, reduce recipe accordingly.

* * *

Deluxe Scalloped Potatoes make a zesty vegetable dish to accompany the cheese, baked ham and luncheon meat trays frequently assembled for summer entertaining. There's little work preparing this casserole Potato slices simmer with garden-fresh onion, carrot and mushroom slices in milk to which canned condensed cream of mushroom soup is added

DELUXE SCALLOPED POTATOES

- 2 quarts thinly sliced peeled potatoes (about

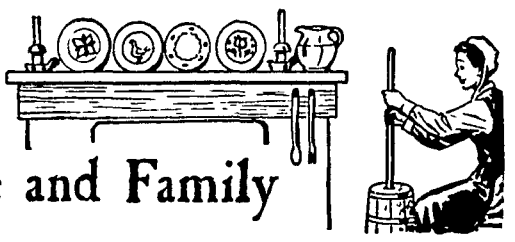
For the Farm Wife and Family



Ladies, Have You Heard? . . .

By Jane Thurston

Save The Garment Tags

THURSTON

To keep your family's clothes in good condition keep a file of garment tags The tags give helpful information for care of each garment.

Make a note of the family member's name and garments on the tag, for example, Mary's red skirt — to remind you of which label goes with which garment

Keep the tag file near the laundry room . . . then you'll be less tempted to guess how to wash instead of looking up how to wash a certain garment.

Saving garment tags is a thrifty thing to do. Properly cared for garments last longer and give more satisfactory wear than mistreated ones.

Be sure you get the label or cleaning instructions when you buy a garment Save the label and use it Clean out your file now and then to keep it in good working order.

---

Moss on lawns is usually a sign of low fertility, poor drainage, improper watering, too much shade, or a combination of these factors. John C Harper II, Penn State extension agronomist, suggests removing the moss by hand raking, or by spraying with copper sulfate Apply at the rate of five ounces in four gallons of water per 1,000 square feet After the moss is removed, correct the cause.

CHECKERBOARD

service bulletin

239 eggs average from 259,000 hens

You hear a lot of "chin music" about results produced by various feeds, regardless of quality, feed efficiency or price. Usually the cheapest feeds claim the best results.

You don't have to listen to "chin music" about results on the Purina Program Some of us Purina dealers have collected accurate year-long records from 128 Purina-fed flocks here in the East These are the totals:

128 flocks 259,402 birds 65 7% aver. production 239 eggs per bird 4.35 aver. lbs feed per doz. 4.0 or less conversion on many flocks	12 to 15 months lay

Please note that these are not two or three carefully-picked records. These cover 128 flocks from small to very large. Figure your feed cost per dozen. We believe you'll quickly prove to yourself Purina feeding costs you less.

Studies Show Less Pecking In "Organized" Flock . . .

Every flock of chickens has a social order called "peck" order. In a small flock, every hen fights every other hen, learns which she can peck and which she had better dodge. Scientific studies show pecking is nearly cut in half when the flock becomes "organized" — when each hen knows where she stands in the order. If you mix flocks or add new birds, this process is repeated to establish a new order.

Have new birds debeaked. Debeaking won't stop fighting, but it reduces possibility of serious injury. Debeaking is the answer when birds are lost from pecking. It also stops losses from "blowouts." Temporary eversion of the oviduct is normal with egg laying. It becomes a "blowout" if the oviduct remains hanging externally. This is likely to happen in flocks where vents have been damaged by excessive vent pecking.

Cut CRD In Day-Old Chicks
Use NEW Purina Tylan Soluble

Now . . . you can help knock out costly CRD infection in day-old chicks with Purina Tylan Soluble. Tylan Soluble contains tylosin, a new, fast-acting antibiotic that cuts down the most common cause of CRD in baby chicks.

When your chicks first arrive, add this powerful Health Aid to their drinking water. We can supply you with Purina Tylan Soluble in economical 100-gram or 2-gram packets.

Knock out CRD with new Purina Tylan Soluble in chick drinking water.

AMOS FUNK, MILLERSVILLE R1, PRESIDENT of the Pennsylvania Horticultural Council, makes a presentation to Dr Russell Larson, Director of Cooperative Extension in Pennsylvania Larson was head of the University Department of Horticulture before his appointment to the Extension Service post In the picture are, L to R, John Peters of the Penna Canners Association, John Eisler, Pennsylvania Nurserymen; Larson; Funk, Penna Vegetable Growers, and Joseph Johnson, Jr, of the Penna Flower Growers All four men with Larson are past presidents of their respective organizations Larson was given a leather traveling bag and a certificate of appreciation The presentations were made at a recent meeting of the Pennsylvania Horticultural Council at the Penn State campus.

Egg Chick Hatch In Down Trend

Poultrymen can expect laying flocks to be smaller this fall and winter according to Kermit Birth marketing specialist from the Pennsylvania State University

Birth bases his estimate on the number of pullet chicks hatched for laying flock replacements

Through May of this year 9 per cent fewer chicks were hatched nationally for laying flock replacements On June 1 there were 9% more eggs in incubators than a year ago

In the last 6 months of 1961 the hatch was 23 per cent above the same period in 1961 Thus more pullets were housed the first half of this year than a year ago This has contributed to the lower prices

The number of layers on farms in the United States in May was 1 per cent above the season when chicks are hatched for laying flock replacements It could well result in less month-to-month price variation for the different sizes

The price spread between large eggs and the smaller sizes this fall is not expected to be as wide as a year ago because of the reduced number of replacements to be housed

Size of the laying flock this fall will also be influenced by the rate of culling of the 1961 same date last year This coupled with an increase in the rate of lay resulted in nearly a 3 per cent increase in production Favorable weather contribution to the increase

In Pennsylvania during May production was about 3 per cent below the same month a year ago.

The increase in the laying flock replacement hatch during the last half of 1961 was offset by the decrease the first 5 months of 1962 For the past 11 months, July 1961 through May 1962 the United States hatch was down almost 2 per cent while the Pennsylvania hatch has less than 1 per cent above the same period a year earlier In the West North Central area the hatch was down - almost 19 per cent In the South Atlantic area it was up 9 per cent

The trend indicates changes taking place in poultry production in these areas Prices the last quarter of the year probably will average about the same as a year earlier

The trend toward a higher July-December hatch of layer replacements is expected to continue The hatching pattern reflects changes in the cent of hens held over. This may be affected by egg prices. If the rate of culling is normal, the laying flock size in the nation, and this state too, for the last quarter of the year may be slightly smaller than a year ago

Revised estimates indicate further decline in per capita consumption of eggs

Egg prices received by Pennsylvania producers the last quarter of the year are also expected to average about the same as a year ago

Pa. Milk Use Increases

Pennsylvanians, bucking the national trend of decreased milk consumption, drink more milk today than ever before according to a study just completed by the Pennsylvania Milk Control Commission

State residents now drink a glass and a half of milk per day compared to a little over one glass of milk in 1946 . . or 12 ounces today, compared to 10 and 4/10 ounces in 1946. Milk consumption increased 15% per capita during the period surveyed by the state agency.

In direct opposition to recent news that milk consumption nationally is decreasing, the Pennsylvania trend upward ought to come as good news for state dairymen selling milk in the state Pennsylvania dairy farmers last year produced milk valued at over 323 million dollars, as dairying continued to be agriculture's top money earner in the Keystone state.

The Milk Control Commission credited work by the many agencies promoting the sale of milk with a major share of the responsibility for the increase in Pennsylvania's milk consumption

Commission Chairman, Simon K Uhl said, "These agencies stress well balanced diets, including milk and other dairy products This has been extremely successful in major urban areas such as Philadelphia, Pittsburgh and Scranton-Wilkes-Barre.

Uhl also pointed out that Pennsylvania consumer milk prices have continually been lower than most surrounding states for the past 15 years He said that in Pennsylvania during June, an average of 26 2c was charged per quart of home delivered milk The national average during June was 26 8¢.

Quoting from the June issue of the U S Department of Agriculture's Fluid Milk and cream Report, Milk Commission Chairman Uhl said milk prices ranged from 28¢ to 31½¢ in most surrounding states. Ohio, only nearby state with lower consumer prices about one cent lower than Pennsylvania, had very dairy farmer milk prices averaging about $1 20 per hundred lbs of milk less than in Pennsylvania

Data to back up increased milk consumption claims in the Commonwealth, show a population of 10,196,000 in 1946, drank an average of 10 and 1/10 ounces per day based on dairy consumption of 2-432,100 quarts of milk In 1961, the state's population had increased to 11,319,000 who drank 3,119,000 quarts of milk and other fluid milk items per day for a 12 ounce per person daily consumption record.

The 11 01% increase in population over the period, and 28 25% increase in sales, resulted in a 15% increase in per capita milk consumption according to state milk agency officials

Milk price control advocates say Pennsylvania's law has helped strengthen the state dairy industry without pushing consumer prices out of line and without hurting consumption

---

In the herd of Masonic Homes, Elizabethtown Pa., a six year old registered Ayrshire cow named Masonic Homes Constance has completed an official milk production record of 14760 pounds, with 605 pounds of butterfat, on twice daily milking for 305 days

ELIZABETHTOWN, PA. EMpire 7-1545

COWS PROPERLY CONDITIONED
...during the dry period PRODUCE
UP TO 25% MORE MILK!

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and *most importantly they will produce up to* 25% more milk!

See us today for full particulars.

8 medium)
1 medium onion sliced and sliced
½ pound fresh mushrooms, sliced
¼ cup (½ stick) butter
1 10-½-ounce can condensed cream of mushroom soup
1 cup milk
2 teaspoons salt
¼ teaspoon pepper

In casserole, alternate layers of potatoes, onion, carrots and mushrooms Dot layers with butter Combine soup, milk, salt and pepper, pour over vegetables Cover, bake 1 hour in a 350 degree oven Uncover, bake 30 minutes longer or until done

* * *

ZIPPY DIP FOR GARDEN VEGETABLES

1 cup cottage cheese
1 3-ounce package cream cheese
1 teaspoon prepared horseradish
¼ teaspoon salt
Few drops of Tabasco sauce
⅓ cup chopped fresh dill

In a blender or mixer, beat together cottage and cream 4 medium carrots peeled cheeses, horseradish, salt and Tabasco sauce until smooth and fluffy Blend in dill Serve in a hollowed-out cucumber, if desired Use as a dip for vegetables

* * *

TANGY SOUR CREAM

2 cups dairy sour cream
3-4 tablespoons prepared horseradish
2 teaspoons Worcestershire sauce
1 teaspoon celery seed
1 teaspoon salt
½ teaspoon paprika
4 teaspoons finely chopped pimiento olives

Blend sour cream with remaining ingredients thoroughly Chill several hours Serve as a dip for garden vegetables

* * *

CHEESEY CREAM DIP

1 pint dairy sour cream
1-½ cups shredded sharp Cheddar cheese
¼ cup sliced stuffed green olives
½ teaspoon salt
¼ teaspoon sage

Blend above ingredients together and use as a dip for either chips or vegetables Makes 3 cups

STUFFED CELERY

⅔ cup cottage cheese
1 3-ounce package cream cheese
1-½ teaspoon salt

Combine cheeses and salt Fill centers of celery pieces with mixture; sprinkle with seasoned salt Chill before serving Makes 1 cup.

● Have You Heard?

(Continued from Page 9)

ener restores fluffiness and softness in articles you wash Added to the final rinse water, fabric softener forms a coating on the surface fo every fiber This coating reduces static electricity in fabrics of man-made fibers, softens baby clothes, and fluffs terry robes and chenille bedspreads

Fabric softener is sold under several brand names. Follow the directions on the container for its use Because softener makes fabric less absorbent, use it sparingly on dish towels and bath towels

* * * *

Milk Co-ops To Provide Markets Bargaining Agency Official Says

Milk marketing cooperatives are being forced to erect milk processing plants in order to guarantee alternative markets for them production farmers were told Monday night

Clan Pineo, research economist with the Metropolitan Milk Producers Bargaining Agency told milk producers in a meeting at Mount Joy that 'the Agency is "very close to deciding where to put up a plant '

Pineo said to meet the 90 million pounds of milk the agency would need to have committed to make construction or purchase of a plant profitable cooperatives are being asked to commit 30 per cent of their production to the agency

Tom Tedesco field man for the agency said the move is needed to handle 'homeless milk' in periods of flush when present plants can not handle increased volume of milk and more of the surplus has to go into the low value surplus products

Tedesco said 20 milk plants in the New York milkshed have closed since the first of January this year and 30 more are expected to close before the end of the ye

Pineo blamed the switch from cans to bulk tanks and the outdated facilities with the closing of plants.

He said there are only five modern efficient plants in the milkshed and these are incapable of handling the excess milk in times of flush At such times many other, less efficient plants have facilities which are called into service

'If we have to price milk at the break-even point for the inefficient manufacturer to turn it into butter and cheese instead of the higher value utilization products of ice cream cottage cheese and cream we are depriving ourselves of a reasonable return'

Pineo drew attention to what he called a fine line of pricing above which the dealers would not take all the milk every day He said while the bargaining agency had as its primary aim to get the highest possible price for the producer's milk, it has to set a price where handlers will accept all the milk that is produced every day.

"As of July 1 we are under a pricing structure never before in effect in the milkshed' he pointed out, whereby prices in New York are tied to the U S average manufacturing milk price with seasonal adjustments. If we had been under the present structure last year, manufacturers using Class III milk would have been paying 17c per hundred pounds more then they did

If under the higher price structure the handlers continue to take all the production "we will know the dealers have been fooling us in the past ' he said but added, "I don t think they have."

The proposed opening of a manufacturing plant would give the cooperative a better bargaining position. Pineo believes, by removing enough excess milk from the market so that handlers would have to compete for the available supply.

The supply of milk will not go downward in the next few years, Pineo believes, and he pointed to the number of young stock, at the highest point in 8 years, and to higher producing cows.

If farmers are going to keep producing at an increased rate he said the cooperatives are going to have to supply some alternative markets The member cooperatives in the bargaining agency have been asked to commit 30 per cent of their production as well as a proportionate share of the $100,000 for the new plant

The Mount Joy Farmers Cooperative, co-sponsors of the meeting, (with Interstate Milk producers Cooperative) probably would be asked to supply less than 30 per cent to the manufacturing plant because of its record of high Class I utilization and nearness to market, officials of the cooperative believe.

Keep Eggs Cool

Carl Dossin, Penn State extension poultry specialist, recommends gathering eggs often during hot, summer months, and removing animal heat from them as soon as possible.

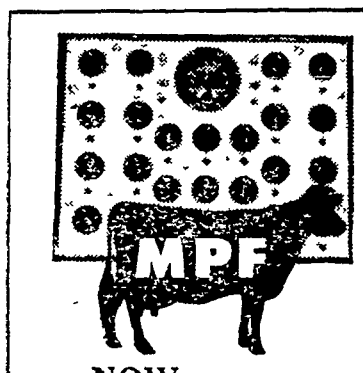
Take Guesswork Out of Dairy Feeding...

The amazing new electronic COWculator eliminates profit loss from over feeding or under feeding. . . helps you obtain the greatest possible income over feed cost. Taking into consideration all the variables which affect milk profits, the COWculator electronically computes the Maximum Profit Feeding program for each cow. . . . in just 60 seconds



NOW you can
"Cowculate"
the best feed level
for cows on pasture!

MELVIN KOSER, one of nine FIELDMEN employed by Lanc. Co Farm Bureau, works out of our New Holland Branch. MEL is well qualified to help you feed more efficiently for greater profits. If a Farm Bureau FIELDMAN is not calling on you, please call Lancaster EX 4-0541 collect, and the FIELDMAN assigned to your area will contact you promptly Our FEED SPECIALIST, Allen Mackey, will gladly visit your farm with your FIELDMAN when requested.

DO IT NOW, take advantage of the services that are yours — Call Farm Bureau for details of our scientific plan for profitable dairy farming.

PASTURE CAN'T DO IT ALONE For peak milk production, supplement your pasture with Farm Bureau's popular DARI-PAK Dairy Ration. It's available in 14% and 16%, tasty Coarse Texture or palatable Pellets. Take yours in bags or bulk — either way you benefit from our Grain Exchange Program — full retail price for your home grain. Ask about our Large-User Program — extra discounts and refunds based on size of deliveries and volume of feed used.

Start Today...Feed the Farm Bureau Way!

Qualified FIELDMEN are anxious to serve and assist you in designing a PROFITABLE DAIRY FEEDING PROGRAM
